

Create your own Marine Food Web activity!

Grades:

6-12 grade

Objective:

Using critical thinking, students will work together in small groups, pairs, or individually to create a marine food web design of their own using mix media art (colored pencils, markers, pictures, clip art, magazine cut outs, etc.).

Materials:

- Any size of background paper you have available- construction paper or large poster board/paper
- Markers
- Glue
- Scissors
- Variety of magazines
- Colored pencils

Activity:

After learning about the marine food web, what it includes, and the pressures it faces- have the students create one of their own using whatever material they choose, or what materials you have available.

Lesson discussion questions:

What should we include on our marine food web design/art work? (examples include- habitat, fish, whales, plankton, people, fishing boats, etc.)

Example:
